Objective, Scope, and Procedures

Objective

Our objective was to complete the annual Virginia Economic Development Partnership (VEDP) Internal Audit risk assessment and develop the FY22 Internal Audit Plan. It is important to note that the potential risks identified in this report don't necessarily point to known control weaknesses, since testing would have to be performed to determine the controls that exist and how these risks are managed. We collaborated with VEDP to perform the following tasks, which are further outlined in the Scope and Procedures section below.

- Information Gathering
- Perform Risk Assessment and Identify the Audit Universe
- Develop the FY22 Internal Audit Plan

Scope and Procedures

This section provides a detailed outline of the key steps we performed.

Information Gathering

- 1. We obtained and reviewed:
 - VEDP's Organization Chart
 - VEDP's Operational Plan
 - Various VEDP Policy and Procedures
 - Recent external audits of VEDP performed by the Auditor of Public Accounts (APA)
 - Other documentation specific to individual VEDP functional areas
- 2. We performed 16 interviews, which included the following:
 - The Chairman of VEDP's Board of Directors
 - The Chairman of the Finance and Audit Committee (FAC) of the VEDP's Board of Directors
 - The VEDP Executive Vice President
 - The Vice President and other leaders from each VEDP functional area

Perform Risk Assessment and Identify the Audit Universe

For each functional area, we identified key processes and evaluated their associated risks based on the information we gathered. We then assessed the potential likelihood of risks not being mitigated and the significance of its impact to VEDP based on the following table:

RISK LEVEI	EXAMPLES					
High	 Events may result in significant non-compliance with legal / regulatory requirements Events may result in significant concerns with the accuracy of financial reporting Events may result in sustained or serious loss of earnings, cash flow or credit Events may create significant opportunity for fraud, such as misappropriation of assets o fraudulent financial reporting Significant reliance on technology exists, and sufficient automation does not exist Key operational processes are not mature or properly monitored / controlled Significant issues remain unresolved from previous audits Key personnel resources do not exist or are not competent An issue materializing is probable and requires Board attention and Senior Managemen action Volume of transactions is significant Dollar amount of transactions is significant Events may result in significant negative impact on the accomplishment of the Operating Strategic Plan 	nt				
Medium	 Events may result in a moderate level of non-compliance with legal / regulatory requirements Events may result in some concerns with the accuracy of financial reporting Events may result in some loss of earnings, cash flow or credit Events may create some opportunity for fraud, such as misappropriation of assets o fraudulent financial reporting Moderate amount of reliance on technology exists, and automation needs improvement Some operational processes are not mature or properly monitored / controlled Issues that remain unresolved from previous audits are not significant but need attention Some personnel resources may not exist or are not competent An issue materializing is possible and requires Senior Management attention and Middle Management action Volume of transactions is moderate Events may result in moderate adverse publicity or moderate loss in brand value Events may result in moderate negative impact on the accomplishment of the Operating Strategic Plan 	pr n e				

RISK LEVEL	EXAMPLES								
	* Events are unlikely to result in non-compliance with legal / regulatory requirements								
	* Events are unlikely to impact the accuracy of financial reporting								
	 Events may result in minimal or no loss of earnings, cash flow or credit 								
 Events are unlikely to create opportunities for fraud, such as misappropriation or fraudulent financial reporting 									
	 Minimal reliance on technology exists, and sufficient automation exists 								
	 Operational processes are sufficient and properly monitored / controlled 								
Low	 Issues from previous audits are resolved or are minor 								
	 Personnel resources are sufficient in number and are competent 								
	 An issue materializing is unlikely and can be resolved by Middle Management 								
	 Volume of transactions is minor 								
	 Dollar amount of transactions is minor 								
	 Events may result in minimal impact on publicity or brand value 								
	 Events may have minimal negative impact on the accomplishment of the Operating / Strategic Plan 								

We compiled the results of the risk assessment and classified the risk in each functional area as "High", "Medium" or "Low" for each of the following seven risk categories, which were considered when developing the descriptions in the table above:

- Compliance
- Financial
- Fraud
- Technology
- Operational
- Reputation
- Strategic

We then assigned an overall composite risk rating of "High", "Medium" or "Low" to the functional area based on the individual risk ratings of the seven risk categories (see Summary Risk Ratings section). These overall composite risk ratings were then used as the basis for identifying key risk priorities that would be most important to VEDP. However, VEDP management is responsible for making final risk determinations and reporting results to the Board.

Also included for each functional area is a list of potential risks (see Appendix A: Functional Area Potential Risks section) we identified during our information gathering and communications with VEDP Management and the Board. In total, we identified over 200 potential risks across all the functional areas. However, these listings are not intended to be all-inclusive.

Develop the FY22 Internal Audit Plan

After performing the risk assessment, identifying potential risks in the audit universe, and consulting with VEDP we drafted the FY22 Internal Audit Plan. Our Plan is a tool to help VEDP make business risk decisions. However, VEDP Management, in consultation with the Board, is responsible for determining the timing and extent of audit coverage based on their risk appetite and the amount of resources they want to devote to the internal audit process.

Internal Audit Plan

The table on page 5 depicts the audits performed in FY18 thru FY21, and the tentative FY22 Internal Audit Plan (Plan) for VEDP. We have also included in the Plan the completion of the annual risk assessment and follow-up on management action plans from findings issued during these internal audits. These are routine tasks that exist for any internal audit function.

Summary Risk Ratings

The table below depicts our summary risk rating for each functional area, which are based on the risk rating of the seven risk categories. These individual risk categories are assigned 3 points if rated "High", 2 points if rated "Medium", and 1 point if rated "Low". The points for each of the seven risk categories were totaled to determine the composite rating for each functional area, in accordance with the composite rating point scale below.

High (17 – 21 points)
Medium (13 - 16 points)
Low (7 - 12 points)

Internal Audit Plan for FY22

We have included the following FY22 Internal Audit Plan for VEDP Management and the Board. The table below also depicts which functional areas were audited in FY18 thru FY21. The table also includes a one-time audit we performed in FY20 on VEDP's efforts towards addressing the JLARC findings / recommendations in their November 2016 report. The extent of audit coverage for FY22 will be determined by VEDP Management and the Board based on how many resources they want to leverage for the internal audit function. It should be noted that significant changes occurred in the Business Investment and Talent Solutions Divisions in recent years and changes continue to take place. Therefore, audits of these area were scheduled for FY21 and FY22 to better reflect an appropriate time to perform these audits.
